INTEX SOL
HIGH TECH FUNCTIONAL TEXTILES

SpaceMat® 3D Mattress Cover

Pressure Relief and Climate Control
for increased Sleeping Comfort.

What makes SpaceMat® so **SPECIAL**?

Pressure squashes most normal mattresses and mattress covers, warmth and moisture build-up.

The result: noticeable pressure, frequent turning, unpleasant sweating and disturbed sleep.

Against this there is an easy and effective solution. This is made possible by our **SpaceMat's®** innovative 3D AirMesh technology because it:

- relieves your body whilst you sleep
- improves circulation
- prevents the build-up of warmth and moisture
- reduces movement during sleep
- supports the regeneration phase
- is hygienic and easy to care for
- can be used in many ways.

Qualities you can sense straight away and won't be able to do without.
For high standards and sound sleep.

What **CAN** SpaceMat® do for you?

Simply lay the high-quality 3D mattress cover onto the existing mattress and secure using the extra wide elastics- now you are already ready to enjoy the improved sleeping comfort. The highlight: since the high-tech cover comprises thousands of flexible bouncy microfibres, you will float as if on an airbed when you sleep from now on.

Optimal Absorption

SpaceMat® moulds itself to the contours of your body and spreads your body weight evenly over its entire area. The excellent memory of the microfibres means that they right themselves quick as a flash every time the body weight shifts and provide accurate pressure relief in every sleeping position. Circulation is improved, spine, muscles and ligaments are optimally taken care of - just as an orthopaedist would recommend.

Perfect pressure relief. Anatomical support.

PRODUCT INFORMATION

SPACEMAT® 3D MATTRESS COVER

Natural Climate Control

Looked at up-close, 3D AirMesh is air surrounded by microfibrils. This cushion of air allows the skin to breathe better and directs excess heat and moisture away from the body. In addition, pressure on the mat pumps out warm moist air and fresh air is sucked in when the pressure is removed. This ventilation effect reduces perspiration and encourages the dry sleeping climate recommended by doctors.

How does SpaceMat® **WORK**?

Premium HYGIENE

3D AirMesh consists of only one high-tech polyester which repels moisture and dirt and is anti-bacterial, mould resistant and odourless. As a result, **SpaceMat®** is especially suitable for allergy sufferers.

A Clean Solution

SpaceMat® is free of chemical additives, is machine washable, dries quickly and can be used again and again. For extra skin compatibility and environmental friendliness. **The cleanest sleep ever!**

2 Functions in 1

The two different surfaces of the 3D AirMesh components, bound together with high-quality quilting, offer additional comfort. This enables either the snugly soft side or the rougher structured surface with micro-massage effect to be used if necessary.

Like sleeping on a **CUSHION OF AIR**, for the most relaxing night's sleep you have ever had.

SpaceMat® 3D mattress covers, the practical cover for **EVERY SEASON!**

SpaceMat® 3D mattress covers offer the best comfort the whole year round. This is because the air cushion has an insulating effect- the same as double glazing for windows. Whether summer or winter, the climate control provides improved sleeping comfort and allows you to wake up fresh and well-rested.

At home, away in a hotel or on holiday, the ultra-light, flexible and clean **SpaceMat®** mattress cover means you will never have to do without your usual healthy sleeping comfort again.

NB: Ideal for camping, caravans and boats-well, everywhere there is an increased risk of damp.
