

SPACEMAT® 3D FITNESS MAT

INTEX SOL
HIGH TECH FUNCTIONAL TEXTILES

SpaceMat® 3D Fitness Mat

The first breathable fitness mat with climate control and shock absorption system.

**BRAND
NEW
PRODUCT**

What makes SpaceMat® so **SPECIAL**?

Developed in co-operation with fitness trainers and therapists.

Uncomfortable sweaty training mats covered in rumped up towels are finally a thing of the past.

Incomparable to normal foam mats. Normal foam mats are no match: Since only the **SpaceMat**® 3D fitness mat with 3D AirMesh technology has an absorption system with climate control that:

- gently supports motion sequences
- optimally cushions the body
- prevents the build-up of moisture and warmth
- guarantees grip and a stable footing
- hygienic
- easy care
- has many uses.

Qualities you can sense straight away and will not be able to do without. For high standards and healthy training.

What **CAN** SpaceMat® do for you?

From now on training will be simply more relaxed, as if you are on an airbed as this high-tech mat comprises thousands of flexible and bouncy microfibrres.

PRODUCT INFORMATION

SPACEMAT® 3D FITNESS MAT

Optimal Absorption

The **SpaceMat®** moulds itself to the shape of your body and evenly spreads your body weight over its entire area. Whether lying, resting on your knees or elbows or sitting, the microfibres right themselves as quick as a flash every time the body weight shifts and provide pressure relief in every exercise position. Circulation is improved and muscles, tendons and joints are optimally taken care of.

Perfect pressure relief. Anatomical support.

Natural Climate Control

Looked at up-close, 3D AirMesh is air surrounded by microfibres. This cushion of air allows the skin to breath better and directs excess heat and moisture away from the body. In addition, pressure on the mat pumps out warm moist air and fresh air is sucked in when the pressure is removed. This ventilation effect reduces perspiration and improves the body's microclimate.

The Advantage: You need less energy to regulate your body temperature and you will be able to sense the feeling of body warmth. In addition, the air cushion protects from cold coming up from the floor-in the same way as the insulating double glazing of windows.

More performance and well-being during active phases.

How does SpaceMat® **WORK?**

Premium HYGIENE

3D AirMesh consists of only one high-tech polyester which repels moisture and dirt and is anti-bacterial, mould resistant and odourless. As a result, **SpaceMat®** is especially suitable for allergy sufferers.

Free of Additives

SpaceMat® is free of chemical additives, is machine washable, dries quickly and can be used again and again. For extra skincompatibility and environmental friendliness. **The cleanest training ever!**

Ultra-light and Foldable

Elements that fold and a weight around 30% lighter than foam mats make transit child's play. In addition, the pressure release can be variably adjusted allowing the mat also to be used as a pillow or a cushion.

Anti-slip Feature

A special point coating on the underside ensures a stable footing and a good grip on all smooth surfaces.

SpaceMat® 3D fitness mats are just as **INDIVIDUAL & VERSATILE AS YOU ARE!**
